

# Introducing our **wastesaving audit**

We guarantee to reduce your waste disposal costs by **up to 90%**

Our baling and compacting equipment can help reduce the costs associated with waste disposal and generate a value in the recyclable material that would otherwise be thrown away or your waste management provider would benefit from.

## Our exclusive Wastesaving Audit includes:

### Wastesaving Audit :

- ✔ A free site survey to review your current waste disposal practice and recommend areas where savings can be made in terms of waste minimisation and improved recycling
- ✔ A free bespoke consultation with one of our experts to see how you can reduce your waste disposal costs and whether you could even earn money from the recyclable material you generate
- ✔ If you're still not convinced, our team will discuss the opportunity for a free trial of the suggested equipment so you can be confident of our recommendations

## Making waste reduction easy

Our high quality balers and compactors are easy-to-use and designed for durability, strength and reliability.

All our machines are installed by one of our fully trained installation engineers and, we offer flexible service and maintenance plans and a 24 hour response to keep your machine running smoothly and efficiently at all times.
