

Tackle waste costs

We've got the kit to **tackle your waste costs**

UK businesses spend millions of pounds every year paying for the disposal of their waste - money that could be **put back into their business.**

The UK generates 202.8 million tonnes of total waste of which businesses generate approximately 13.65% of that waste.*

phs Wastekit offers baler and compactor solutions that help businesses reduce their waste disposal costs by up to 90% and in many cases even generate an income from their waste.

What are balers and compactors?

Put simply, balers and compactors are machines that reduce the volume of your waste and package it in a way that makes it easier to manage. Recyclables like paper, cardboard and plastics are compressed into bales ready for resale or collection.

Benefits :

- ✔ Reduces waste disposal costs by up to 90% by reducing the need for collections
- ✔ Keeps your premise tidier, using less space than bins
- ✔ Potentially provides a new revenue stream for your business by selling your recyclables
- ✔ Recyclables like paper, cardboard and plastics are compressed into bales ready for resale or collection
- ✔ Quick return on investment

*According to Government statistical service, Department for Environment food and rural affairs.

Achieve your **recycling targets**

Every business in the UK has a duty to deal with their waste responsibly, reduce their reliance on landfill and increase the amount they recycle. Landfill Tax, Waste Management Regulations and other legal duties are all in place to promote environmental responsibility.

Balers and compactors help you to achieve recycling targets and stay compliant in a cost-effective and simple way. phs Wastekit offers a whole service solution to help organisations reduce waste costs. As well as supplying high quality baler and compactor machines, phs Wastekit offers servicing and maintenance across the UK.

National business targets on packaging and recycling obligations for UK businesses

Packaging recycling obligations for packaging producers are determined by national business targets set by the government. The targets are intended to ensure that the UK complies with the packaging recycling targets set out in Directive 94/62/EC on packaging and packaging waste.

Material	2014 (%)	2015 (%)	2016 (%)	2017 (%)	2018 (%)	2019 (%)	2020 (%)
Glass	75	76	77	77	78	79	80
By which re-melt	65	66	67	67	67	67	67
Aluminium	46	49	52	55	58	61	64
Steel	73	74	75	76	79	83	85
Paper	69.5	69.5	69.5	75	71	73	75
Plastic	42	47	49	51	53	55	57
Wood	22	22	22	22	38	43	48
